TEL 01223 839990

On the front page of this leaflet it gives the overall costs of a set of Gates with a good quality Automation System installed with Radio Controls. This Page deals with some of the optional Control devices you may require in addition to the Radio Remotes.

**GSM Intercom** uses the Mobile phone network to call your Landline or Mobile Phone. You can then speak to a visitor and open the gates from your phone (Integral Keypad Included) **Installed £995 Plus VAT**

**Price for multiple call buttons on application**

**Wireless Intercom** uses a digital wireless signal to connect to handsets inside the property. You can then speak to a visitor and open the gates (Integral Keypad Included) **Installed £895 Plus VAT**

### Keypad

This enables Tradesman, Friends & Family to gain entry with a pin code. Usually there are 2 separate functions that can be programmed, allowing both gates to be fully opened with one code and one gate leaf Partially opened for pedestrians with the second code

**Installed £270 Plus VAT**

### Exit Ground Loop

This would be cut into or buried under your driveway, it is an induction device that detects metal objects like a vehicle and triggers the gate to open.

This is very useful for allowing visitors to leave, having been let in via the Intercom System or Keypad

Installed depending on drive surface From **£350 Plus VAT**

### Exit Push Button

This would normally be sited on one of the inside Safety Beam posts, and would be used by pedestrians to exit through one gate leaf which would open partially when the button is pressed and close automatically after a short time delay.

**Installed £95 plus VAT**
